## *GRÖNFELD* planters

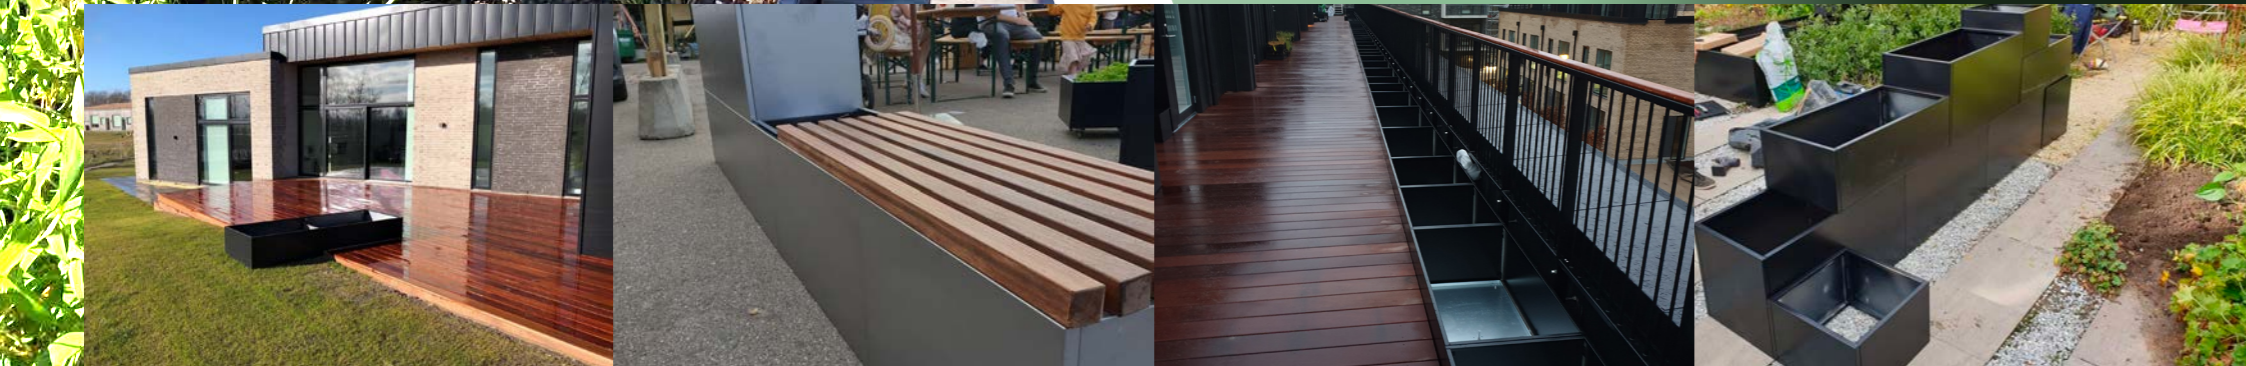

*The original high quality modular garden system –*

*Simplicity in design and use – Scandinavian contemporary design and craftsmanship*

are proud to be sole agents in Ireland for  
*GRÖNFELD planters*  
*The original high quality modular garden system.*

**Keane Landscaping Services Ltd.** are proud to present leading manufacturer - Grönfeld who are a renowned leading producer of raised bed planters. We work with our commercial and residential clients to provide the planting solutions that they need. The modular garden system from GRÖNFELD allows you to make your own design - build on top, build lengthwise or build across. Put your raised garden bed on the ground or add wheels or legs for mobility and height - or add a bench element to sit on or a multipurpose tray to create a water mirror among the greenery. These raised bed planters are ideal for any recreational or outdoor social areas both in public and industrial spaces as well as private residential gardens. You also have the choice of adding snail protection to optimise your crop production.

Design your patio, garden or outdoor space with stylish extended garden beds or planter boxes, without the use of tools. All raised garden beds from GRÖNFELD are easily assembled by our unique click system.

These raised garden beds are available in length 25, 40, 60, 80 and 120 cm. But it doesn't stop there! The raised garden bed is made up by modules that can be attached lengthwise - your garden bed can become exactly as long as you want it to be. See examples below - suitable for large buildings or yards.

*Simplicity in design and use – Scandinavian contemporary design and craftsmanship*

## Finished to a high standard

### Black aluminium raised beds

Raised black aluminium garden beds and accessories made from powder coated aluminium in the colour dull black. This material is corrosion resistant and will last for many years. The unique method of double-folded edges in top and bottom secures stability in small as well as large elements. All standard models are available with bottom plates, wheels or legs and can be combined with bench elements and/or snail fences. Enjoy a minimalistic modern-looking garden or landscaped area with splashes of greenery.

### Corten steel raised beds

Corten steel raised garden beds made from 2mm corten steel. Compared to raw iron, corten steel is very corrosion resistant and has a lifespan of +20yrs. Over time the corten steel develops a beautiful rusty surface without tearing the material. The unique method of double-folded edges in top and bottom secures stability in small as well as large elements. Elements in corten steel are a beautiful addition to any garden or landscaped area where you want to blend the sophistication of design with the inviting atmosphere of being close to nature.

### Galvanised metal raised beds

Raised garden beds made from galvanised steel. The elements come with a shiny surface but over time develops a matte finish. The unique method of double-folded edges on top and bottom secures stability in small as well as large elements. The material is corrosion resistant and has a lifespan of +15yrs. All standard models are available with bottom plates, wheels or legs and can be combined with bench elements and/or snail fences. Elements in galvanised steel give a pure modern impression, which will fit many surroundings.

## The stylish, low maintenance outdoor space

This raised planting system is ideal for commercial and industrial settings - its modern feel gives a contemporary, minimalistic style, suitable for any staff or public amenity area as well as outdoor garden space.

**Your raised bed planter is supplied pre-packed and comes ready to assemble. As part of a larger project, we can install your raised flower beds, maintenance can be arranged as part of your annual maintenance contract.**
